

i²c Diploma Supplement on Innovation: CALL FOR APPLICATIONS NOW OPEN!

It's time again for applications! The [Innovation Incubation Center \(i²c\)](#) opens the call for the already 7th class of the [Diploma Supplement on Innovation](#), the international supplementary curriculum providing a premium, hands-on education on intra- und entrepreneurship for bachelor/master/PhD students of TU Wien, which is unique in international comparison.

The i²c is offering the Diploma Supplement on Innovation since 2012, when it started as an education on intra- und entrepreneurship for master students of the faculty of informatics only. Since 2016, the curriculum is open for all students (bachelor, master and PhD) from all TUW-faculties. The next class will start in October 2018 and pitch their innovative projects at the Diploma Demo Day in June 2019.

For this class, the i²c is now calling for applications from excellent TUW-students, who

- have an innovative (business) idea but no clue how to realize it
- are interested in bringing their research or (seminar) project result to market
- want to learn more about intra- and entrepreneurship
- want to found their own company or work in the corporate innovation field

In the curriculum the students will

- get trained in innovation management, creative idea generation, design thinking, prototyping/MVP, business modelling, finances (national and international), legal issues (business law, intellectual property rights, patent right and research, licensing), teambuilding, leadership, conflict management, human resources, marketing, sales, PR, pitching and more
- generate and shape their own innovative idea
- get educated by experienced experts in their respective field and guest lecturers from internationally renowned universities
- implement the lessons learned in their own project
- have access to i²c's inter-/national network of lecturers, mentors, founders, investors, industry and science partners and i²c alumni
- work together with like-minded students from different backgrounds in interdisciplinary teams
- get the chance to be accepted into the [TUW i²ncubator](#) to further develop their project
